

Project Demo Planning

Date	24 June 2026
Team ID	SWTID-2026-3249
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures the OptiCrop project is presented effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Problem Statement	Explain challenges in traditional crop selection and the need for OptiCrop	2	Geethika Beduduri
2	Dataset & Preprocessing	Walk through the Crop_recommendation.csv dataset and feature engineering	2	Valluri Mounika
3	Model Training Overview	Explain the Logistic Regression training pipeline in train.py	3	Geethika Beduduri
4	Web Application Walkthrough	Show the Flask app structure - home, predict, and about pages	3	Bhavya Sri Rajavarapu
5	Live Prediction Demo	Enter sample soil/climate values and show the real-time crop recommendation	3	Habeeba Nagarathugari
6	Q&A; Session	Address evaluator questions on the model, architecture, and future scope	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Frame the agricultural inefficiency problem OptiCrop solves
2	Solution Overview	Summarize the ML pipeline and Flask-based delivery
3	Live Feature Demonstration	Submit real N, P, K, temperature, humidity, pH, and rainfall values
4	Q&A; Session	Open floor for evaluator questions
