

Customer Journey Map

Date	24 June 2026
Team ID	SWTD-2026-3249
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Discovery & Onboarding	Stage 2: Data Input & Recommendation	Stage 3: Harvest & Feedback
Actions <i>What does the customer do?</i>	- Hears about OptiCrop from a local agri-extension officer, cooperative meeting, or WhatsApp/SMS campaign - Downloads the OptiCrop mobile app and creates a farmer profile - Enters basic farm details: location, land size, soil type, and current crop	- Uploads soil-test results, weather data, and current crop-stage details - Reviews AI-generated recommendations for irrigation, fertilizer dosage, and pest control - Applies the suggested actions in the field and logs activities in the app	- Tracks crop growth and yield outcomes through the in-app harvest tracker - Compares actual yield and cost savings against previous seasons - Submits feedback/ratings and renews or upgrades the subscription for the next season
Touchpoint <i>What part of the service do they interact with?</i>	- OptiCrop mobile app / landing page - WhatsApp / SMS awareness campaign - Local agri-input dealer or extension worker demo	- OptiCrop dashboard & recommendation engine - IoT / soil-sensor integration (where available) - Push notifications and in-app chatbot support	- In-app yield & profitability tracker - Customer support helpline and feedback survey - Seasonal performance report / email summary
Customer Thought <i>What is the customer thinking?</i>	"Will this app actually help me increase my yield and income?" "Is my farm data safe, and will it be misused?" "Is this easy enough to use in my own language?"	"Are these recommendations really accurate for my specific field and soil?" "How exactly do I put this advice into practice today?" "What happens if I don't follow a recommendation on time?"	"Did following OptiCrop's recommendations actually improve my yield and income?" "Should I continue using this, and would it help to recommend it to other farmers?" "Is the subscription cost worth the value I received?"
Customer Feeling <i>What is the customer feeling?</i>	Curious and hopeful, but a little skeptical and unsure about the effort required to get started.	Engaged and increasingly confident, though occasionally overwhelmed by the volume of data and new terminology.	Satisfied and relieved if results are positive; growing trust and loyalty toward the platform.

Process Ownership <i>Who is in the lead on this?</i>	Marketing & Onboarding Team, supported by Field Agronomists / Extension Partners	Data Science / Agronomy Advisory Team, with Customer Support for in-app queries	Customer Success Team and Product Team
Opportunities <i>How can we improve this stage?</i>	• Offer a short local-language video walkthrough during signup • Simplify the registration form to 2-3 minutes with voice-input support • Provide an in-person or call-based onboarding assist for low-literacy users	• Add simple visual explainers (icons, short clips) alongside each recommendation • Introduce a real-time chatbot or helpline for quick clarification • Summarize recommendations into a single "today's action" checklist	• Showcase a clear before/after yield-and-income comparison dashboard • Introduce a loyalty discount or referral rewards program for returning farmers • Use feedback to personalize recommendations for the next crop cycle
